

Unalam Tour

Tuesday October 17 @ 10AM.
100 West Road, Sidney, NY

The Southern Tier Chapter of NYFOA is offering a tour of the Unalam manufacturing facility, located in Sidney, NY. This a great opportunity to witness the glue laminated process.

Bethel Woods Center for the Arts, Bethel, NY

Today's leaders at Unalam continue to embody the spirit of tradition meeting innovation. Now, with members of the sixth generation of the Van Cott family working, they continue the tradition of wood products manufacturing.

Glulam products are manufactured in a variety of shapes and sizes to suit your building needs. Their structural glulam units are available in columns, trusses, arches, purlins and beams (floor and roof).

Silver Mountain Hay Barn, Millerton, NY

In 1892, the Van Cott family began selling lumber in Unadilla, NY. In 1906, we made the first Unadilla silo, beginning a product line that would serve farmers until the 80s. To further their commitment to farmers the Unadilla Silo Company experimented with glue laminated barn rafters in 1928. By 1963, the glulam business had picked up steam and they expanded their laminated products division into a new facility in nearby Sidney, NY where they continue production today.

For more than a century, Unalam has built its reputation on a constant commitment to quality and an eye on the future of building.

Great Buddha Hall, Carmel, NY

Come enjoy this tour and learn about the glulam process and custom laminated beams used in construction. We will meet at the manufacturing facility, at 100 West Road in Sidney, NY. Please contact Gary Sergio at cjgs@frontiernet.net, or call 607-563-7713, to pre-register for tour.
