

FOREST HABITAT MANAGEMENT WORKSHOP
IMPROVING OUR FORESTS TO BENEFIT BIRDS & OTHER WILDLIFE
SATURDAY, APRIL 7, 2018

Forest Habitat Management Workshop

Saturday, April 7, 2018

Cornell Cooperative Extension

Ontario Education Center

480 North Main Street, Canandaigua, New York 14424

9:00 – 12:00 p.m.

The Finger Lakes region of New York provides extensive forested habitats essential to the survival of at-risk bird species such as American Woodcock, Canada Warbler, Brown Thrasher, and many others.

Individual and family forest owners are encouraged to attend to learn about the habitat needs of forest birds, improving habitat for American Woodcock and other songbirds and game species, and resources and programs available to help you manage your forest sustainably.

Expert Presentations From:

Audubon New York, Cornell Cooperative Extension, and
USDA Natural Resources Conservation Service

For more info, visit: ny.audubon.org/forestworkshop

Free to attend. Please RSVP by April 5, 2018.

Questions? Contact Suzanne Treyger,
